

Southern Utility Repair LLC

SUR-Dolly

Transformer/Pole Section Dolly

Effectively cut costly landscape repair jobs with the transformer and pole section dolly. Haul transformers across lawns without destroying the property. An optional cradle allows linemen to strap pieces of poles to be removed up to 6 feet long with the dolly. The dolly is a dual use tool for taking down overhead lines where vehicles cannot reach. The wide tires insure that no damage is done to lawns. Stop paying for the needless yard repair with the **SUR-Dolly**.

Easy to Maneuver
Large base allows for control and stability with heavy items

Adjustable
Lift any size of transformer with moveable latch

Versatile
Move winged transformers and pole sections without problem

SUR-Cradle Optional

Haul pole sections up to 6 feet with the dolly

Attach to top pin position

Features

- Keep heavy lifting to a minimum
- Ability to double as a pole dolly
- Secure strap eyelettes
- Split handles for multiple users
